

Ordering and Contact Information

How To Order

Ordering is easy. Simply find a tile sample in this catalog, or from our website www.haciendastudios.com, and refer to the listed code numbers to place your order.

If you would like to create your own design – simply select any border pattern to accompany any field tile and apply the colors of your choice by referring to the color chart or the assembled tile samples. You may also want to consider any other combination such as a border used only with a solid color tile, etc. You will only be limited by your imagination!

Custom Orders

We can create or work with new designs and colors of your choice with an up-charge to cover the additional time and work. If you require a color not seen in this catalog, refer to the Pantone Matching System color charts, or submit paint chips from your local paint store. We can match just about any color, though exact matches are not guaranteed due to certain limitations of colored pigments available for concrete.

Need Some Help?

For information regarding cost, fabrication details, quantities required for your project, or turnaround times, please contact us with your questions. We guarantee timely and accurate assistance when you contact us.
